AMENDMENTS TO THE CLAIMS:

Please amend the Claims as follows:

1. (Currently Amended) A radio base station for performing a radio communication with a plurality of mobile stations, each of which has a plurality of antennas, with a space division multiplex method, the radio base station being characterized by:

transmitting, when the radio base station starts a communication with a mobile station by the space division multiplex method, an instruction to stop performing a diversity reception using the plurality of antennas to the mobile station,

wherein the mobile station stops the diversity reception using the plurality of antennas and performs a reception using one antenna

a capacity to establish a radio connection with each of the plurality of mobile stations, optionally using a space division multiplex method; and

when the radio base station and the plurality of mobile stations have established radio connection using the space division multiplex method, and the radio base station starts a communication with one of the plurality of mobile stations using the space division multiplex method, transmitting to the mobile station an instruction to stop performing a diversity reception that uses a plurality of antennas, and to start performing a reception that uses a single antenna.

(Original) The radio base station of Claim 1 comprising:
a creation means for creating a piece of traffic channel assignment

Application Number: 09/781,585 Attorney Docket Number: 101201-00013 information after receiving a traffic channel assignment request from a mobile

station;

an attachment means for attaching the diversity reception stop instruction to the

piece of traffic channel assignment information; and

a transmission means for transmitting the piece of traffic channel

assignment information with the diversity reception stop instruction, to the mobile

station as a response to the traffic channel assignment request.

3. (Original) The radio base station of Claim 1 comprising:

a determination means for determining, after receiving a traffic channel

assignment request from a mobile station, whether to allow the mobile station to

space-division-multiplex with another mobile station which has communicated with

the radio base station;

a creation means for creating a piece of traffic channel assignment

information when the determination means determines to allow the mobile station

to space-division-multiplex with the other mobile station;

an attachment means for attaching the diversity reception stop instruction to

the piece of traffic channel assignment information; and

a transmission means for transmitting the piece of traffic channel

assignment information with the diversity reception stop instruction, to the mobile

station as a response to the traffic channel assignment request, and transmitting

the diversity reception stop instruction to the other mobile station through a traffic

channel.

4-6. (Canceled)
